

Changing Minecraft server version

To change your Minecraft server version, simply follow these steps:

1. Go to the panel available at: <https://panel.luxxy.cloud/>
2. In the menu on the left, select Startup.
3. In Variables, enter the desired version in the MINECRAFT VERSION field.
4. Then, in DOCKER IMAGE, choose the appropriate Java version.

Required Java versions:

- 1.0 – 1.6 - Java 6/7
- 1.7 – 1.16 - Java 8
- 1.17 - Java 16
- 1.18 – 1.20.1 - Java 17
- 1.20.2 – 1.20.4 - Java 17 (recommended 21)
- 1.20.5+ and 1.21 - Java 21

5. Next, from the left menu select Files, and delete the server.jar file.
 6. Download the correct server.jar version from: <https://minecraftversion.net/>
 7. Upload the new server.jar file to your server.
 8. Start your Minecraft server.
- ☐ Done! Your server will now run on the version you have selected.
